

## Animal Healthcare and Veterinary Phytotherapy: Science and Practice

Reims, France, 30 August – 3 September 2006

### Final program:

|               |                                                                                                                                                                                                                 |
|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 8:30 – 9:10   | Registration                                                                                                                                                                                                    |
| 9:10 – 9:15   | Welcome                                                                                                                                                                                                         |
| 9:15 – 10:30  | <b>Impulse lectures</b>                                                                                                                                                                                         |
| 9:15 – 9:45   | Impulse Lecture I:<br><b>Herbal Veterinary Medicinal Products: a European legal perspective</b><br>Sophie Barreteau, ANMV - French agency of veterinary medicinal products, France                              |
| 9:45 – 10:15  | Impulse Lecture II:<br><b>Veterinary phytotherapy: herbs and medicinal plants to prevent and treat livestock diseases</b><br>Michael Walkenhorst, FiBL - Research Institute of Organic Agriculture, Switzerland |
| 10:15 – 10:30 | Q&A Session                                                                                                                                                                                                     |
| 10.30 – 11.15 | Coffee Break, Posters, and Industrial Exhibition                                                                                                                                                                |
| 11.15 – 12.50 | <b>Veterinary Phytopharmacology and Clinical Research</b>                                                                                                                                                       |
| 11:15-11:45   | Keynote Lecture I:<br><b>Essential oils and essential oil components as antimicrobial agents in veterinary medicine</b><br>Matthias Melzig, Freie Universität Berlin, Germany                                   |
| 11:45-12:00   | Invited Short Lecture:<br><b>Discovery of Antiparasitic Lead Compounds from Medicinal Plants in China for Veterinary Drug Development</b><br>Xiaofei Shang, Chinese Academy of Agricultural Sciences, China     |
| 12:00-12:15   | Contributed Short Lecture I<br><b>Botanical supplementation: an effective approach to manage tail biting in pigs farm</b><br>Claire Maltret, Nor Feed, France                                                   |
| 12:15-12:30   | Contributed Short Lecture II                                                                                                                                                                                    |

|               |                                                                                                                                                                                                                   |
|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <b>Safety and efficacy of inhaled essential oils for the treatment of respiratory conditions in horses</b><br>Isabelle Lussot-Kervern, Veterinary phyto-aromatherapy network, RéPAAS, France                      |
| 12:30 – 12:50 | Q&A Session                                                                                                                                                                                                       |
| 12.50 – 14.00 | Lunch-Break, Posters, and Industrial Exhibition                                                                                                                                                                   |
| 14.00 – 15.15 | <b>Ethnoveterinary medicine</b>                                                                                                                                                                                   |
| 14:00 – 14:30 | Keynote Lecture<br><b>Historic and current ethnoveterinary use in Britain and Ireland</b><br>William Milliken, United Kingdom                                                                                     |
| 14:30 – 14:45 | Invited Short Lecture:<br><b>Thirty years of experience in prospecting the Brazilian biodiversity for veterinary medicines</b><br>Ivana Barbosa Suffredini; Núcleo de Pesquisas em Biodiversidade – NPBio, Brasil |
| 14:45 – 15:00 | Contributed Short Lecture<br><b>Contributing to the MedPlants4Vet project: Ethnoveterinary plant knowledge in the Catalan linguistic area</b><br>Fuencisla Cáceres, Universitat de Barcelona, Spain               |
| 15:00 – 15:15 | Q&A Session                                                                                                                                                                                                       |
| 15.15 – 15.45 | Coffee Break, Posters, and Industrial Exhibition                                                                                                                                                                  |
| 15.45 – 17.00 | <b>Animal Self Medication</b>                                                                                                                                                                                     |
| 15:45 – 16:15 | Keynote Lecture<br><b>From Orangutan Self-Medication to Antiparasitic Drug Discovery</b><br>Ivona Foitová; Masaryk University Brno, Czechia                                                                       |
| 16:15 – 16:30 | Invited Short Lecture:<br><b>When Poison Becomes Medicine: Chemical Ecology and Self-Medication in the Great Bustard</b><br>Carolina Bravo Parraga, Universidad Complutense de Madrid, Spain                      |
| 16:30 – 16:45 | Contributed Short Lecture<br><b>Self-medication behavior through the consumption of supplemental feed in chickens under heat stress</b><br>Laurence Guilloteau, INRAE, France                                     |
| 16:45 – 17:00 | Q &A Session<br>Wrap-up of the Symposium                                                                                                                                                                          |
